

BytePro Enterprise

Enterprise Class Loan Origination Solution

Designed especially for mortgage bankers, banks, and credit unions, BytePro Enterprise is a self-hosted loan origination system that enables you to quickly move loans from origination to sale on the secondary market.

BytePro Enterprise is built on the latest technology, including Microsoft.NET and Microsoft SQL Server. BytePro Enterprise is deployed within your network environment, giving you control over your data.

For lenders seeking a lighter IT footprint, our BytePro Online option includes hosting of your BytePro database, streamlined product updates and automatic database backups.

Workflow

Tailor BytePro to your own process vision with powerful and flexible workflow tools

■ Task Management

BytePro's task management feature automatically creates workflow steps when needed, where needed. Embedded metrics make it easy to evaluate performance, detect bottlenecks, and manage priority exceptions.

■ Document Imaging

Integrated within BytePro is a document imaging system that makes going paperless a breeze. You can split, merge, stack, and barcode documents, and tie them to underwriting conditions.

■ Product and Pricing

Key product and pricing vendors are integrated directly into the BytePro platform, enabling your users to price loans, request locks, and perform "what if" analyses.

■ Customization

BytePro is ready to use out of the box and can also be tailored to your unique business needs with custom fields, screens, documents, validation rules and macros.

Compliance

Our comprehensive compliance features help you avoid costly mistakes

■ Compliance Audits and Fraud Reports

Reduce unnecessary risk exposure by configuring BytePro to run compliance audits and fraud reports automatically when the loan status changes.

■ TRID and QM Made Simple

Monitor disclosure requirements, earliest closing dates, cure requirements, and QM status – all in real time. Enforce appropriate change-of-circumstance reasons at the fee level.

■ Validation Rules

Define granular custom data validity requirements. Warn or stop a user upon changing status, printing a document, or changing screens.

■ Audit Trails

BytePro tracks every change made to every field. With a simple mouse click, you can determine who changed any field and when.

Service

Count on Byte Software to provide industry leading support and service

■ Implementation

Accelerate your timeline with turnkey workflow solutions and best practices. Let us help you tackle HMDA, ECOA, Fair Lending and other business problems. For the do-it-yourselfer, our team of professionals can share sample project plans and best practices documentation.

■ Technical Support

Our clients enjoy access to knowledgeable and responsive support professionals.

■ Training

Enjoy access to a library of videos and other training resources. Our Professional Services department offers a menu of trainings for purchase and can develop custom training to your requirements.

■ Custom Shop

Powerful customization features allow our clients to build truly custom-built solutions on their own, but we also like to help. Talk to our Professional Services department about what you want to build in BytePro.

BytePro provides unprecedented control over your loan manufacturing process. Control is good. If you like control, contact us at 800.695.1008 or email sales@bytesoftware.com.

Byte Software is a business partner of CBCInnovis, a leading provider of credit reporting and real estate settlement services.
