

VIRTUAL ECONOMIST

Your personalized AI assistant to anticipate market shifts before they happen.

Access mortgage forecasts powered by proprietary Optimal Blue machine learning models—built to give executives unmatched clarity and confidence.

Choose Your Avatar

Select your personalized economist assistant and interact via voice or text prompts. Ask questions like: “What happens to mortgage rates and lock volume if the Fed cuts rates more than expected?”

Enterprise Planning

Forecast future volume to guide staffing, throughput, and capacity decisions.

True Predictive Modeling

Built for forecasting and scenario analysis – not basic conversational AI.

Risk Management

Model market volatility and macroeconomic disruption before they affect margins.

Exclusive Market Intelligence

Combines Optimal Blue proprietary lock data with public economic signals for a unique forecasting output.

How It Works

FORECAST

Unbiased predictions powered by machine learning and proprietary market data

TEST

Model rate, Fed, and macro scenarios instantly

DECIDE

Turn forecasts into planning and risk actions

Built for C-suite executives and senior leaders in capital markets, risk, operations, and finance responsible for forecasting, staffing, and profitability
